

Mobile District U.S. Army Corps of Engineers is currently not in drought operations.

For additional information regarding the current ACF drought status, please visit the NIDIS (National Integrated Drought Information System).

<https://www.drought.gov/drought/dews/acf-river-basin>

NIDIS provides information on the current drought status of the entire United States. It also provides links to useful data, maps and tools used to assess drought conditions. Additionally, each month, a webinar is held for the ACF Basin to provide updated information on the climate, water and drought status. Below is a link to the webinar from May 16, 2016
