OKATIBBEE	01 April - 01 June	28-Apr	343.50	343.00	27-May		Ongoing

1. The goal is to manage the reservoir or river conditions for 4-6 weeks within this 8 week period, if conditions allow. Steady lake levels may be impossible to achieve during floods and droughts.

* Following the Water Control Manual Plan (WCP) and the Biological Opinion issued by the FWS
